

Get the look of wood trim
WITH THE ENDURING BEAUTY OF FIBER CEMENT.

Introducing HardieTrim® 2X™ boards

James Hardie now offers a 1.5-inch thick HardieTrim® board composed of 5/4 fiber cement trim backed with .5-inch thick lightweight EPS foam. This innovative trim can give you the deep shadow lines of wood trim, but with the durability and lower maintenance of fiber cement. Achieve long-lasting beauty with a full complement of sizes and widths – up to 12 inches – in Smooth or Rustic Grain® textures.

Siding | Trim

Achieve instant curb appeal and lasting character with a complete fiber cement exterior

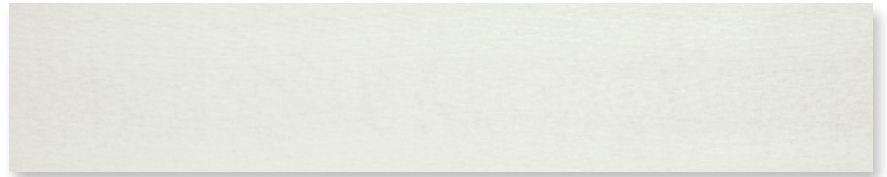

Complement the distinctive lines of HardiePlank® lap siding with new HardieTrim® 2X™ boards to keep your homes looking beautiful longer.

- Thick, 1.5-inch trim profile adds a finishing touch that has the strength to stand beside America's #1 brand of siding
- Available in a full range of sizes, widths and textures to authentically capture any home design
- Unlike wood, our new trim is Engineered for Climate® to withstand hot, humid conditions and blistering sun
- Resistant to moisture, cracking, shrinking and swelling
- Lightweight foam backing enhances workability for easier installation – without sacrificing performance
- Will accommodate 1.5-inch window flanges
